EXHIBITING COMPANIES

C.P.S. (Costruzione Pistoni Speciali) based in Zappia is young, dynamic, in constant evolution and able to satisfy even the most demanding preparation teams operating in track, rally, nautical, road and vintage car restoration sectors.

More than twenty years of experience by its founder, constant research into new technological solutions and the use of increasingly advanced instrumentation for the exclusive production of press-worked pistons for competitions are the warranty of a superior quality product.

MOTOR RETTIFICA - F.lli Matino has operated for more than thirty years in the motoring sector with special attention on products to ensure very high quality standards. The company specialises in the construction of valves for competition engines, vintage vehicles, to design, by sample, drilled and threaded. H-type connecting rods to design in steel for all requirements. Construction of valve guides and cam shafts. Face-plates in ergal, titanium, mechanical tappets to design, adjustable pulleys in ergal, head nuts/bolts, cylinder barrels to design in steel and spheroid cast iron, conrod nuts/bolts.

NAVA LINEA SPORT designs and produces every type of gasket, using some of the most advanced production processes and technologies in the sector, to ensure products with maximum quality and reliability for its clients. We can supply head cylinder gaskets for competition, vintage, industrial, marine and motorbike engines. Seal packs in stainless steel, exhaust manifold gaskets in stainless steel, emery-finished gasket kits

and engines complete with oil seals.
